

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of the claims in the Application.

**Listing of Claims:**

1. (original) A backup system for a computer having a hard drive comprising:  
a program appliance comprising a program attachable in data communication  
with the computer; and  
a data storage appliance attachable in data communication with the computer,  
wherein the program is configured to copy the files from the hard drive to the  
data storage appliance without installation of the program on the hard  
drive.
2. (original) The backup system of claim 1 wherein the program appliance and  
the data storage appliance are the same appliance.
3. (original) The backup system of claim 1 wherein the program is further  
configured to execute automatically upon the program appliance being  
attached to the computer.
4. (original) The backup system of claim 1 wherein the program is further  
configured to copy the files from the data storage appliance to the hard drive  
without installation of the program on the hard drive.
5. (original) The backup system of claim 1 further comprising:  
a network in data communication with the computer; and  
a server computer in data communication with the network,  
wherein the data communication between the data storage appliance and the  
computer is provided through the server.

6. (original) The backup system of claim 5 wherein the program is further configured to copy the files from the data storage appliance to the hard drive without installation of the program on the hard drive.
7. (original) The backup system of claim 5 wherein the program is further configured to execute automatically upon the program appliance being attached to the computer.
8. (original) A computer-readable medium having stored thereon a data structure comprising:  
a storage address table; and  
a plurality of files,  
wherein the storage address table identifies a first backup with which a first set of the plurality of files is identified, and  
wherein the storage address table identifies a second backup with which a second set of the plurality of files is identified, and  
wherein files common to the first backup and the second backup are represented only once within the plurality of files.
9. (original) The computer-readable medium of claim 8 wherein the first backup and the second backup are performed as to a first computer and a second computer, respectively.
10. (original) The computer-readable medium of claim 8 wherein the first backup and the second backup are performed as to a first computer at a first time and at a second time, respectively.
11. (original) The computer-readable medium of claim 8 wherein the storage address table comprises a set of file names.
12. (original) The computer-readable medium of claim 11 wherein the storage address table is further comprised essentially of:

**RPS920030060US1**

**PATENT**

a computer state tag;  
a computer type;  
a model number; and  
a serial number.
